Genie lite 3

rescue deck

The Genie Lite 3 rescue deck enables you to fit a second front-mounted rescue to your Genie Lite 3 harness. A second rescue can be easily deployed with either hand in case your primary rescue handle cannot be reached or becomes caught by the glider. It also enables the Genie Lite 3 harness to meet the requirements of FAI Cat 1 competitions.

The Genie Lite 3 rescue deck also fits most other cocoon harnesses which feature a cockpit with velcro.

DETAILS

- Compatible with Yeti UL rescue S and M
- Compatible with other ultralight rescues
- Connects to the harness main carabiners

- Option to connect to only a single carabiner
- Carry handle for easy transportation
- Attachment points for flight instruments
- Zipper pocket extraction system avoids the use of velcro

- Flat shape allows a large area cockpit thanks to the long packing method of the rescue
- Plastic rod in the rescue handle helps maintain the shape and ensures it is always easily accessible in flight.
- Light but durable Roseta 70D fabric

RESCUE BRIDLE CONNECTION

Recommended connection method

Alternative connection method (not recommended)
